EDUCATION

K. J. Somaiya Institute of Technology, Affiliated to University of Mumbai

May 2023 – May 2027

Bachelor of Technology in Computer Engineering (Honors - AIML)

CGPA- 9.48

Courses: Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, DSA

WORK EXPERIENCE

Claidroid Technologies (Remote)

Generative AI & Agentic AI Intern

Dec 2025 - Jan 2026

- Developed a scalable **AI-powered Hospital Management System** using **Python**, and **Agentic AI**, integrating multiple predictive models for **bed occupancy forecasting**, **medicine inventory forecasting**, and intelligent hospital resource management.
- Designed AI workflows by combining **Weather APIs**, **inventory data**, and machine learning models to support data-driven decisions across **multiple hospitals** within the organization.

Machine Learning Intern – Finance

June 2025 - July 2025

- Worked with **financial datasets** using **Python** for **data preprocessing**, **feature engineering**, and **machine learning model evaluation**.

PROJECTS

CommUnity- For Committee and Clubs

[\[Link\]](#)

Django | MySQL | Python | Generative AI

- Built a **Django** and **MySQL** based portal with **role-based access**, **SQL-backed database**, backend APIs, and automated event approval workflows.
- Implemented **AI-powered document generation** to create post-event reports and integrated **Google Calendar APIs** for efficient event scheduling.

GeoSwipe – Interactive Earth Exploration Using Hand Gesture

[\[Link\]](#)

Python | React | MediaPipe | Three.js | Socket.IO

- Developed an **AI-powered Earth exploration platform** with real-time hand gesture recognition, integrating REST APIs, computer vision, and geospatial datasets for interactive quizzes and country identification.
- Built a heritage exploration system featuring 110+ UNESCO heritage sites, AI itinerary generation, Google Street View, 3D models, and real-time escape route planning using location-based services.

AI-Based Internship Recommendation System

[\[Link\]](#)

Python | Machine Learning | Flask | SQL

- Developed an AI-powered Internship Recommendation System** using **Python**, implementing **data preprocessing**, **feature engineering**, **similarity-based recommendations**, and a **database-backed web application** for efficient internship matching and data management.

[\[Link\]](#)

Atomix: Your Personal Laboratory With Ai

- Developing Atomix, a Unity-based **3D virtual** chemistry lab enabling interactive experiments, **AI-assisted guidance**, and **real-time molecular visualization**

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL

Web Development: HTML5, CSS3, Bootstrap, Tailwind, React.js, Node.js, Express.js, Flask, Django

Databases & APIs: MySQL, MongoDB, SQLite, PostgreSQL, RESTful APIs

Tools & Platforms : Git, GitHub, Vite, VS Code, Vercel, Docker, Postman, AWS Cloud (EC2, S3 – Basics), Render, Unity

Data & Analytics: Relational Database Design, Data Preprocessing, Data Analysis, Feature Engineering, ETL Concepts

VIRTUAL EXPERIENCE

Deloitte Australia – Technology Job Simulation | Forage

- Completed technology-focused, client-style tasks simulating real-world consulting scenarios
- Gained exposure to problem-solving, system analysis, and applying technical concepts in business contexts

ACHIEVEMENTS

- Winner – IET InTech 2K26 (National Level)** and **TechnoGenesis 2K24** Project Competitions.
- 2nd Prize – AI-Robotics Project Exhibition & Competition**, Somaiya AI-Robo Festival 2026.
- Presented Project at CIIA (Creative Ideas & Innovations in Action)** National-Level Innovation Showcase.
